# NITRILE GLOVE RANGE

The chemical resistance chart is provided as a guide for qualified professionals who recommend, select and specify or otherwise determine the suitability of protective products for worker safety. This chart is to be used primarily as a starting point and is provided for advisory purposes only. The suitability of a product for a specific application must be determined and tested by the purchaser.

Innovative Gloves Co., Ltd. Manufacturing Company assumes no responsibility for the suitability of a user product selection for the specific application.
