FEATURES & BENEFITS

HD COOLANT CONCENTRATE

DUO PRODUCTS HD COOLANT CONCENTRATE is a unique blend of organic long life corrosion inhibitors and ethylene glycol designed to provide superior corrosion protection and anti-freeze / anti-boil protection for all types of petrol, diesel, and gas engines in heavy duty commercial, industrial, on-highway, marine, mining, and stationary equipment, as well as light commercial and passenger vehicles.

DUO PRODUCTS HD COOLANT CONCENTRATE is a phosphate, borate, silicate, amine, and nitrate free coolant.

- Extends the period between changing coolant
- Service life of 10 years / 1,000,000kms (whichever comes first) when used as recommended
- Provides maximum anti-freeze / anti-boil protection
- Maximises protection of all metals, especially aluminium alloys, commonly found in the cooling system
- Provides optimum reliability and operating life of water pumps (as it is a silicate free product)
- Excellent cavitation and liner pitting protection
- Protects against scale rust and residue build up
- Maximises fuel economy by keeping the engine at optimum operating temperature
- Minimal disposal volume of spent coolant required
- Formulated, tested, and manufactured in Australia for Australian conditions

HD COOLANT PREMIX 50 / 50

DUO PRODUCTS HD COOLANT PREMIX 50 / 50 is a unique blend of organic long life corrosion inhibitors and ethylene glycol designed to provide superior corrosion protection and anti-freeze / anti-boil protection for all types of petrol, diesel, and gas engines in heavy duty commercial, industrial, on-highway, marine, mining, and stationary equipment, as well as light commercial and passenger vehicles.

DUO PRODUCTS HD COOLANT PREMIX 50 / 50 is a phosphate, borate, silicate, amine, and nitrate free coolant and should be added to the cooling system as is.

- Extends the period between changing coolant
- Service life of 10 years / 1,000,000kms (whichever comes first) when used as recommended
- Provides maximum anti-freeze / anti-boil protection
- Maximises protection of all metals, especially aluminium alloys, commonly found in the cooling system
- Provides optimum reliability and operating life of water pumps (as it is a silicate free product)
- Excellent cavitation and liner pitting protection
- Protects against scale rust and residue build up
- Maximises fuel economy by keeping the engine at optimum operating temperature
- Minimal disposal volume of spent coolant required
- Formulated, tested, and manufactured in Australia for Australian conditions
- Product is premixed with distilled water making it ready for use

ENVIRO HD COOLANT PREMIX

DUO PRODUCTS ENVIRO HD COOLANT PREMIX is a superior, fully formulated, nitrite-organic acid technology (OAT), ready to use propylene glycol based engine coolant. It is more robust than both conventional and organic acid technology (OAT) engine coolants. DUO Products Enviro HD Coolant Premix is recommended for use in automotive, light duty and heavy-duty diesel applications such as on-road truck, off-road mining, farm and marine where an environmentally acceptable coolant is required. It provides protection for up to 4 years, 6000 hours or 500,000 km.

DUO PRODUCTS ENVIRO HD COOLANT PREMIX contains no silicates, phosphates or amines whilst utilising one of the most advanced corrosion inhibitor packages available on the market.

Whilst Duo Products Enviro HD Coolant Premix is compatible with most propylene glycol based coolants, it is good practice to drain out the used coolant, flush the system to remove remaining used coolant and deposits, then refill the system with the new coolant mixture. Duo Products Enviro HD Coolant Premix should be added to the cooling system as is.

PERFORMANCE STANDARDS

Duo Products Enviro HD Coolant Premix meets many common performance standards for OEM vehicles manufactured after the year 2000.

PRODUCTS MEET OR EXCEED OE SPECIFICATIONS. REFER TO PRODUCT DATA SHEET.
